## Our Focus in MyCaDO

We would like to expand our many years of experience in the development of solutions for HR departments in this project

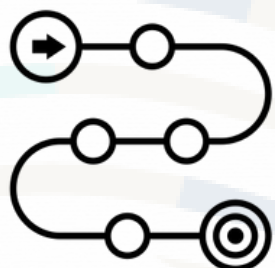

We can use our existing experience in analysing processes and designing databases to develop and connect existing and new solutions - my employees, my processes, my requirements  
MyDaCo

## The impact we aim for

We want to develop an instrument in which existing and new programs are tailored to the target group. Interfaces and performance must not be neglected.

The aim is to create a tool that is user centered and **expandable**, **stable** and **secure** in order to support the professional future of users and offer companies planning security for the coming years.

## Our MyCaDO role

Help finding decisions  
on the way to success

Connecting People and  
Systems

Imparting specialist  
knowledge in the field  
of database design and  
API development

Have an eye on security  
and data privacy
